Agenda

1. Dependency injection principles
2. Dagger2
3. Dagger2 Android

Dependency injection principles

What is a dependency?

```
/** Class A */  
class A {  
    // ....  
    fun doSomething() {  
        val text = "...."  
        b.log(text)  
    }  
}  
  
/** Class B (dependency) */  
class B {  
    fun log(text : String) {  
    }  
}
```

Dagger2

Dagger2 Android

Questions?
